EDUCATION

Carnegie Mellon University

Master of Science in Mechanical Engineering
QPA: 3.83/4.00

Pittsburgh, PA

May 2021

The University of Akron

Bachelor of Science in Mechanical Engineering, Minor in Applied Mathematics
GPA: 3.78/4.00

Akron, OH

May 2019

PROFESSIONAL EXPERIENCE

Westinghouse Electric Company

Robotics Engineer

Madison, PA

Summer 2020

- Implemented path planning in ROS to improve mobile robot semi-autonomous teleoperation navigation stack
- Conducted simulation framework and unit tests to ensure VFH+ and A* planning performed as expected
- Performed conceptual design for a novel multi-robot inspection system
- Communicated with suppliers and potential vendors for product selection and market research

Moen

Engineering Co-op

North Olmsted, OH

Spring 2017, Fall 2017, Summer 2018

- Developed, prototyped, and evaluated new product concepts
- Designed critical components for a high-volume product based on analytical and marketing feedback
- Used CFD tools and math models to maximize product attributes such as flow rate and pressure
- Performed finite element analysis to efficiently design critical components against pressure and consumer use

S&C Electric

Electroplating Intern

Chicago, IL

Summer 2016

- Wrote standard work orders, formed relationships with suppliers, advanced operator aptitude certification system

ACADEMIC PROJECTS

Carnegie Mellon University

Computational Engineering and Robotics Lab • *Control Project Group*

Pittsburgh, PA

Spring 2020 - Present

- Research tethered UAV controller design, simulation, and application
- Used reinforcement learning methods to create UAV control policy that rejects disturbances
- Simulate tethered UAV dynamics in PyBullet for use in reinforcement learning environment
- Design a UAV controller development platform based on PX4 and MAVROS

24-774 Advanced Control Systems Integration • *Model Predictive Control Hardware Integration*

Fall 2020

- Wrote an MPC C++ application that achieved position and balance control of a two-wheeled robot

24-787 Machine Learning & Artificial Intelligence • *Tethered Quadcopter Reinforcement Learning*

Fall 2020

- Learned a stabilizing controller for a tethered drone simulated in PyBullet using reinforcement learning methods

16-899 Adaptive Control & Reinforcement Learning • *Improving State Estimation Through Filter Learning*

Spring 2020

- Improved state estimation of a simulated quadcopter using machine learning techniques

16-868 Biomechanics & Motor Control • *Modeling Bipedal Balance Strategies*

Fall 2019

- Modeled a robust 2D bipedal controller using Simulink that recovers standing balance under disturbances

The University of Akron

Senior Design Project • *Autonomous Combat Robot*

Akron, OH

Spring 2018 - Spring 2019

- Designed, built, and analyzed a platform for the development of an autonomous combat robot
- Won first place at senior design showcase for Health, Robotic, and Manufacturing System Design

NASA Robotic Mining Competition Team • ME/EE Divisions & Treasurer

Fall 2015 - Spring 2019

- Lead the design and fabrication of the robot's locomotion and excavation systems and LED driver PCB

Biomedical Engineering Design Team • *President & Various Projects*

Fall 2015 - Spring 2019

- Created and delivered tools and toys for children in the local community with disabilities

SKILLS

Programming: Advanced - C++ (Eigen, Boost), Python (NumPy, SciPy), C | Intermediate - JavaScript

Applications: Advanced - MATLAB, Simulink, SolidWorks, Creo | Intermediate - ANSYS FEA, EAGLE PCB

Other Skills: Control Systems (Classical, PID, LQR, MPC), Robot Operating System, Simulation (Gazebo, PyBullet), Linux (Ubuntu, Debian), Object Oriented Programming
